Company Capabilities - Proudly Made in the U S A

Produce consumer friendly products that are persistent, safe, and easy to use. LONG LASTING HAND SANITIZER, WORKS FOR HOURS

Company Core Technology

Microbe Solutions, DBA Common Sense utilizes a safe disruptive technology that is incorporated into our products to provide persistent sanitizing. Common Sense forms a layer over its treated surface, like your hand and prevents germs from forming. Think of it as a layer of electrically charged swords. When a micro-organism comes in contact with the swords, the swords puncture, shock and inactivates the germ. Unlike all others, the Common Sense Molecule does not lose strength! It remains ready for that next germ. This layer of persistent protection does not rub off easily. On your skin it comes off naturally with exfoliated skin cells. On hard surfaces it is abraded away over time. EPA NO. 95656 AND 95656-1

COMMON SENSE KEY POINTS

- ✓ Eliminates cross contamination
- ✓ Stops odor caused from bacteria, viruses, fungi, mold, and mildew.
- ✓ Safely works for hours

NAICS Codes

325611 Soap and Other Detergent Manufacturing*
